Welcome

Welcome to the Wyveria Minecraft server!

This server is a Perpetual Vanilla-Like SMP with a focus on community. Being a perpetual server means that the server is upgraded for every major update, and intends to be around for ever.

Note: If the server maintainer becomes incapable of hosting, then the files will be made freely available to all players.

We hope you enjoy your time on the Wyveria server! Head over to the server rules, and then over to getting connected.

Server Rules

These rules are a general outline of what not to do, use your head, don't ruin it for others.

- **Respect All Players**: Treat everyone with kindness and respect. No harassment, bullying, or hate speech.
- **No Griefing**: Do not destroy or modify other players' builds without permission.
- **No Cheating**: Use of hacks, cheats, or exploits is strictly prohibited.
- **Keep Chat Clean**: No spamming, advertising, or excessive inappropriate language in the chat.
- **Protect Your Builds**: Claim chunks containing your most important builds to avoid any potential griefing.
- **No Stealing:** Do not take items from others without permission.
- **Report Issues**: Inform admins of any bugs, issues, or rule violations.
- **Be Considerate**: Avoid actions that negatively impact others' gameplay, like unnecessary PvP or causing lag.
- **Follow Admin Instructions**: Listen to server admins and follow their instructions.
- **Have Fun**: Enjoy the game and contribute to a positive community atmosphere.

Getting Connected

This server utilises ViaVersion to allow newer Java clients to connect, and Geyser to allow Bedrock clients to join. It is worth noting that the Bedrock experience is not without flaws, but is still very much playable.

Wyveria can be connected to from any version that is using the most recent update (e.g. 1.21), new versions of an update (1.21.1 or 1.21.2) may take a few days to be usable, as ViaVersion needs time to update.

To connect to Wyveria, first, ensure that you are whitelisted (see section below), then create an entry in your servers lists.

The domains for each platform are:
Java: wyveria.net
Bedrock: bedrock.wyveria.net:19132

Before you can properly connect, you will need to be added to the whitelist. Get in contact with the server owner using the following channels:

Discord: KyrVorga#6454
Email: contact@wyveria.net
Messenger: if you know you know.

If you have issues connecting to the server, use the aforementioned contact channels.

FAQ

Once we have some commonly asked questions, we will put them and their answers here.
